

The Self Care Alliance

Supported by 1 in 4 Lives & Intel present

The Role of Technology and Innovation in Supporting Self Care in the Australian Health and Care Sector

Roundtable - Monday, 27 July 2015 - UNSW City Campus, Sydney

PANELIST

Mr Gary Morgan

Director MPTI Group
Chair 1 in 4 Lives Collaborative

Gary Morgan is an innovation and strategy leader who creates outcomes for his clients by helping them to develop their digital innovation and business strategies, capabilities and capacity to introduce improved or new digital-based product and service offerings, in order to grow their businesses and create value.

He is an experienced board director with over 20 years ICT Science, Research and Innovation and Health ICT leadership both as an executive and consultant with a focus on driving innovation, strategy, business performance, international collaboration, commercial licensing, development and growth in organisations. This includes securing over \$250m in technology and services revenue, government and research grants, and venture capital funding and delivering more than 7x return on initial investment in a venture capital backed research spin-off company

He is a Director of a private company specializing in innovation, strategy and value creation and his recent board roles and projects have dealt with innovative product development and service delivery innovation for some of Australia's largest health care technology companies and community care providers. Currently Gary is developing and delivering national and regional seminars and workshops on robotics.

In 2014 Gary co-authored a White Paper entitled "One in Four Lives – The Future of Telehealth in Australia". He is an Adjunct Professor at Queensland University of Technology and an Honorary Professor at the Chinese Academy of Sciences and holds an MBA and Graduate Diploma from Queensland University of Technology and a Bachelor of Commerce degree from Griffith University.
